Drove to farm and inspected right side of feeder house and drives
 Found feeder house cracked and bent in various areas
 Removed platform from machine onto trailer
 Drove combine to shop
 Blew off machine and feeder house

R&R shields and covers
R&R belts, hoses, cables, and hardware to remove feederhouse
Inspected and figured estimate for feederhouse repairs
Drove to Abilene Machine and inspected two feederhouse
assemblies
Loaded feederhouse assembly and brought back to shop
Cleaned and inspected this feederhouse
Disassembled feederhouse to replace flooring and false bottom
R&R feeder chain and top shaft assembly
Replaced with top shaft and chain off of original feederhouse
R&R various covers and replaced as needed
R&R and welded in new wear strips
R&R lower shaft and reverser assembly
Replaced with ones off of original feederhouse
R&R and replaced feeder drum assembly and bearing housing
Replaced bearings on shafts and drum
Swapped various parts and hardware to make one complete
feederhouse
R&R and replaced variable drive assembly
Installed new drive chain, adjusted and aligned
Replaced worn strippers and hardware on front of feederhouse
Checked reverser oil level-ok
Removed front cover and inspected sheeting on original feederhouse
Found that it was twisted, worn and cracked
R&R upper and lower shaft assemblies to install on other
housing
Adjusted reverser cable
Straightened covers for feederhouse
Replaced hardware and welded areas as needed
Ran machine and tested operation
