COMPLAINT:

Check over for prep for auction. Jump electrical system and check batteries/charging system. Check operation of machine.

CORRECTION:

Went to machines location to check why it would not start. Hooked jumper cables to the machine and let charge for a few minutes and machine started fine. Checked charging system on machine and it was in spec. I told customer to let it run for a couple hours and the batteries would probably be fine. Customer had me check error codes on machine and diagnose one gauge. Found machine needed a fuel temp sensor and a transmission oil pressure gauge. When parts arrived I went back to machine and installed a new updated gauge and a fuel temp sensor. Let machine run and no other error came up. Also helped customer get his Komatsu track hoe started. 2 trips 40 miles per trip.
