There is a good chance that we may find more hoses, fittings, and possibly some electrical components that are damaged during disassembly of the machine during repairs. There is also a chance that we may find that the slide out track frame may be damaged along with the main rack frame, that we can not determine if there is damage now with out tearing into the machine.

This estimate also include the service call for two trucks to go on site and remove the machine from the crash site and get it loaded onto a trailer. Then shop labor to look over the machine to figure out was all is needed for the estimate without tearing into the machine.

*Please note that this is only an estimate, all parts and labor are
