CORRECTION:

02 DIAGNOSE: NO REVERSE

Looked over tractor for not having reverse. Found reverse synchronizer out. Split tractor and removed top shaft. Tore top shaft apart and replaced worn parts to reverse syncro. Made sure the forward was good. Also the transmission pump was broke. So I replaced the whole thing. From there I installed the top shaft back in and put tractor back together. Adjusted linkages. I replaced oil filter and filled with oil and ran.

After running it I noticed the hitch did not have full range of movement. Looked into that and found the cable to not be moving far enough. From there I tried to adjust the cable. It would not adjust far enough. So I had to adjust the pinion gears on the inside of the hitch valve housing. That fixed it.

04 REPAIR LEAKING LINE UNDER DASH AND CYLINDER THAT IS LEAKING BADILY

Repaired leaking oil line under dash. Removed line to check to see if it was rubbed through. I did not find anything. except the fitting loose. I then also re-kitted the left hand lift cylinder on the loader.
