Problem Description: Coolant leak

Found coolant to be leaking at the coolant crossover.

Ordered gaskets. O rings and a hose from mike at west fall. Had to order 1 piece. Will deliver when all pieces are in.

While going back together noticed the serpentine belt does not sit into the tensioner pulls correctly. Found that there are 2 different pulleys for the tensioner. Ordered a new tensioner from Napa (jay). Will be delivered after lunch.

Installed belt tensioner. And test drove vehicle. Checked coolant level. All ok.
