Mileage			\$0.00	Mileage	\$0.00
Repair Labor	0.24	\$85.00	\$20.40	Repair labor	\$20.40

Explanation of work performed:

Seg 1) Found machine on yard and moved under awning. Jacked up and blocked machine. Began by removing tracks, rollers, and idlers. Moved tracks into track shop and removed pads from old rails. Once new rails came in, I installed the old pads to the new rails using new hardware. Installed all new bottom rollers, top rollers, and idlers on machine using new hardware. Removed old sprocket and installed new using new hardware. Installed tracks back on machine and adjusted tension to spec.

Seg 2) Ran machine in dig pit and checked all functions. All works well but found that blade cylinder on LH is leaking. I removed the pin from the blade end of the cylinder. I pulled the rod and piston from the barreil. Looked at barreil and it is smooth. I replaced the seals in the gland and piston. Installed the rod back in the cylinder in reverse order of removal. Ran machine and checked for leaks and proper operation of cylinder. No leaks found. Operates as it should.

Seg 3) Removed ripper teeth and replaced with new ones using new hardware. Cleaned out cab and set machine on ready line.

Due Date	NA
Please Pay This Amount	\$18,025.29
