## COMPLAINT:

7- Blow out primary countershaft area and find hole in beater cover.

## CORRECTION:

7- Repair hole above beater in sheet metal..

Drove combine out to compressor and blew out the countershaft area and under the seat. Removed the cylinder variable speed sheaves and found the top cover had a large slit running the length of the cylinder cover. Cut a hole in the grain tank and found that the rear half of the cylinder cover had holes and also needed to be patched. Made patched and welded them in. Made a patch for the grain tank floor and welded it in. Reinstalled the variable speed sheaves and reinstalled belts.
