Quantity	Item Code	Description	Price Each	Amount
		<p>seal. Surface flywheel to install back onto motor and install new pilot bearing. Replace cross shafts on transmission bellhousing and install new input shaft kit with new bearing and cover to install new clutch brake and fork. Install new clutch assembly, Install new motor mounts and install transmission back into unit to hook up shifter, Clutch linkage, Drivelines, Air tanks and lines and make adjustments to clutch and free travel on pedal. Install starter and hook up wiring, Install new air compressor and hook up coolant and air lines. Clean engine block to install new head gaskets and install cylinder heads to torque into place. Install injectors and rocker arms to bar over engine to make adjustment to valves and engine brakes. Install rocker covers, Exhaust manifold, Intake manifold and torque all bolts. Hook up coolant lines and fuel lines. Install all plastic covers and install oil pan with new gaskets. Replace oil filter and fill engine with oil. Replace fuel filter, Remove engine fan blade and radiator supports to remove broken fan shroud assembly and install new one to reassemble fan blade and support rods. Fill cooling system with flush and water to run engine to operating temperature and drain system to flush out debris. Flush with clean water and refill with new coolant to test drive unit and check for leaks to complete repairs on engine. Replace door seal on sleeper door and repair wiring to windshield washer pump to get system to work. Test drive unit to complete repairs and check for any leaks. Top off fluids. Thanks!</p> <p>Sales Tax</p>
