Installed doors.

Topped of the hydraulic tank and transmission.

Had to put new radiator cap on and air filter restriction switch on machine.

Replaced the hydraulic filter, diff lock filter and cab filter.

Installed all the shields, painted engine, topped off the diff, hyd, coolant and checked the tandem oils.

NOTE: The hydr oils are all on SEG 2

COMPLAINT:

01 ENGINE, R&R & RECONDITION

CAUSE:

CORRECTION:

Washed engine area off.

Removed sheet metal around the engine.

Removed engine wiring harness and drained coolant along with engine oil.

7/29/21- Finished unhooking fuel lines and rear bolts to hold flywheel cover on.

Pulled in out of machine and put on engine stand.

Started to disassemble engine.

Removed head, push rods, rocker cover, rocker shaft, oil pan, oil pump.

Removed pistons and rods, front damper, cover, flywheel, rear main seal and crank shaft and camshaft.

Cleaned up main bearing caps and rods.

8/2/21- Cleaned up Engine block and cleaned up oil pan and other engine parts to get ready for assembly.

8/9/21- Installed the crank.

Cleaned up rods, installed on pistons.

Installed pistons in block.

Torqued the rods and mains bearings.

Installed front timing cover.

8/10/21- Reassembled engine and started reinstalling what needs to go in before engine.

8/12/21- Painted bottom half of engine.

Installed engine.

Hooked up top/bottom rad hoses, air cooler hoses, wiring harness, Alt, belt.

Installed new hoses from surge tank to top of head and top of radiator.

8/13/21- Installed the hood/ air cleaner, front hood bracket, engine side doors, battery cables, batteries.

Cleaned terminals on battery and put new battery ends on.

Installed muffler and new inner and outer air filters.

Filled engine up with oil and primed the fuel system.

Had to install new primary filter head/sediment bowl.

8/18/21- Had a hard time getting the fuel system bleed.

Got the machine running.

Checked and adjusted the rpm's set low at 800 and high is 2140.

Had to take throttle linkage apart and clean it up.

Ran machine around, drained the water/ cleaner out to cooling system.

Flushed it again with water.

Filled up with coolant.
