GAINESVILLE TECH TO SS JOB

Job Total: \$2,310.00**Gen- Retail****COMPLAINT:**

LOTS OF ELECTRICAL ISSUES

CORRECTION:

Spoke with customer and drove to location, inspected machine for damage, found various wiring issues and can bus connection problems, started wire tracing in cab and found inter connects between cab and chassis to be damaged, removed cab components to access wiring inside cab, repaired and replaced damaged wiring to cab, removed headliner to find more wire damage, repaired wiring damage in headliner. Attempted to connect service advisor to machine, can only communicating on vehicle channel, no communication via implement channel, traced and load tested wiring from rear of cab to chassis controller and found wiring damage in harness, repaired damage in harness and reconnected to machine, spoke with customer about further repair options and made plan for repairs before season start. cleaned tools and location, left location for next job.

spoke with customer and collected parts from shop, drove to location and continued repair of wiring damage, chased voltage from cab to row units, found power to be available for row units and green star system, but power dissipating under load, looked into DTAC solutions and found solution #98118. Disconnected chassis wiring harness from cab, removed upper half of harness from upper part of machine to access wire loom, crawled into belly of machine and removed covering from chassis wiring harness, chased voltage through circuit 072, found master splice to be corroded and breaking apart, cut back and replaced master splice, re wrapped harness in take and flex coating, reinstalled chassis harness onto machine, tied down harness into proper locations, start and ran machine, normal functions returned to green star system and row units. spoke with customer about options moving forward, customer requested look at accumulator auger constant running issue, removed auger control solenoid to find blown o-rings, spoke with customer about options, cleaned tools and location, left location for next job.

ordered parts at shop for customer as well as over the phone diagnosis of other electrical issues

Customer called with complaint of machine not moving and constant throwing of codes, drove to machine and inspected for damage, found accessory fuse F020 to be blowing at every start up of machine, chased down circuit to locate short, found customer installed radio to be
