REPAIR# 1 C CHR01 NA 09/13/16 09/13/16

HEAD GASKET

COMPLAINT:

Customer is loosing coolant but didn't know where, was suspecting head gasket.

CORRECTION:

Removed front doors and top cover. Drained coolant. Removed ex. and intake manifolds, air intake and lines. Removed rocker arm, push rods, fuel lines and head. Could not find evidence of leaking head gasket but found top of #2 piston had pieces missing and #4 piston had a crack. Customer chose to replace engine. Drained engine, hyd, trans. oils and fuel. Removed rear doors and top panel. Unhooked lines and removed fuel/hyd oil reservoir assembly. Removed front door bracket, side panels and undercarriage pan. Installed trans. brackets, removed bolts between trans. brackets and dampener housing and removed engine. Reman engine came with block and head only. Transferred oil pan, front timing cover, oil cooler, injection pump and all other external parts. Replaced fuel injectors, front dampener, idler pulleys and belt. Installed engine and all removed parts. Ran and washed. Topped off fluids.
