SEGMENT: 1 Will not move Shop Repair

SEGMENT TYPE: Chargeable

Case MODEL: 850K S/N: CAL004740 CUST UNIT: UNIT: EQ0163981 :

WORK SITE: ASSOCIATED SUPPLY COMPANY, INC. 7100 SW Third Oklahoma City OK 73128

LOCATION:

**WORK DESCRIPTION:**

Dewayne 405-795-3932  
Steve 405-630-7159

**CORRECTION:**

Sam- Pulled 2 grousers on both side tracks. Pulled bell washers on both sides. Unloaded off the trailer.  
Sean- The pump drive seal was leaking a lot while running. The machine was towed to the shop to replace the seal. After further inspection, found metal in the hydraulic system. In the Case drainline to where it feeds back into the tank. Before entering the tank. Informed customer. Customer decided to provide a new pump assembly. Started removing and marking hydraulic lines that were located on the pump. There was concern that the hydraulic lines still have some remaining debris. Customer decided to have his mechanic take the original hoses to the hose shop and have new ones made. That caused complications with the assembly process. Due to the hoses being wrong after various times and attempts. The third and final time, I went to the hose shop to resolve the issues. Only one new hose had to be remade. Salvaged all the other new hoses. Installed the pump assembly with all new o-rings. Filled the system back up. Primed the pumps to ensure they worked properly. Started machine to check for leaks. Worked machine in the dirt for 30 to 45 minutes. No leaks found besides BF blade cylinder. Customer declined repair at this time. Parked machine on the ready line.
