CORRECTION:

Installed new engine. Replaced hydraulic oil 76 quarts and filter due to having pumps out. Installed and programmed new v4 main controller due to stealing it off to get their other drill going. Fan was staying at full throttle replaced speed sensor and repaired wiring at coil. Float sensor was not working they had disconnected front wrench switch due to this. Replaced float sensor and calibrated it and plugged front wrench pressure switch back in. Front wrench hydraulic cylinder was broke so we replaced it. Rotating wrench spring was broke so we replaced it. Ran machine down hole for about 2 hour machine runs great.

ADDITIONAL DESCRIPTION:

Engine oil leak

DEO	15W40 MOTOR OIL	10
FRT	FREIGHT	2
