SEGMENT : 1 ENGINE IS LOW ON POWER AT TIMES SHOP REPAIR

SEGMENT TYPE : Chargeable

TAKEUCHI MODEL:TL140R S/N:21400221 CUST UNIT: UNIT:EQ0038385

WORK SITE:LUBY EQUIPMENT 199 AIRPORT ROAD CAPE GIRARDEAU MO 63702

METER : 0.2 LOCATION

WORK DESCRIPTION : C/S ENGINE IS LOW ON POWER AT TIMES AND WILL DIE

CAUSE : 10/04/2024 Verifying the complaint, we test ran the machine and was able to verify the machine was both getting hot and shutting down, the shutting down issue was electrical, after checking the oil pressure sensor, the water level sensor and the wiring to them we verified both the safety relay's were intermittently not working, we removed and replaced both relay's then found the instrument panel also has issues due to having a hole broke in it. We removed and replaced the instrument panel then test ran and found it was not showing to be charging. Old instrument panel showing 3916hrs
