### COMPLAINT:

01. Diagnose and Repair Axle PTO Low Pressure Code.

### CORRECTION:

Arrived at the tractor and diagnosed for the light.  
Found the switch wiring was tapped up so I removed the sensor.  
Found mouse markings on the switch wiring, so decided to jump the harness and see if light went out.  
It did.  
Ordered a switch.  
During the testing found the alternator was not charging.  
Tested the exciter wiring.  
It tested fine so I jumped the wiring and still was not getting anything from the alternator.  
Ordered a new one.  
Installed new pressure switch and tested.  
It was working great.  
Installed new alternator and tensioned belts.  
Tested and it was working great.
