COMPLAINT:

02 MAIN ENGINE HARNESS BURNT UP

CORRECTION:

arrived on site
found machine
keyed on and verified machine had codes
removed lower panels to gain access to harness
inspected harness and found where harness was damaged from mice
removed all p-clips and unplugged all harness connectors
routed harness through machine frame
and removed harness
installed new harness and routed harness through machine
also found that connector X5038 was also damaged
removed wires from connector x5038 and repinned connector with new wires
finished installing new harness
insured all p-clips were installed and Harness was secured to prevent premature wear
installed all panels and started machine
checked for codes
DOC inlet and outlet temp sensors are throwing communication codes
started machine and let machine warm up
performed a service regen and codes became stored
let machine cool down
cleared stored and active codes
released machine to customer
