SERVICE	DESCRIPTION	QTY	RATE	AMOUNT
Job Labor	Engine pushing coolant, diagnosed and found bubbles coming from overflow on coolant reservoir. Removed cylinder head and found the head cracked on five cylinders. counter bores were leaking on front side of #2 passenger side of #4 and back side of #6. removed oil pan and piston/ rods. removed liners and confirmed counter bore problem. Upon cleaning crank shaft, we found that it had been scared badly in turn we had to pull engine and strip it to the block to change the crank shaft. installed crank shaft and new bearings new 16:1 piston groups. new cylinder head and new spacer and head bolts were also installed along with a good worked camshaft and new rollers on rocker arms	80
