-3856-drained oil from transmission. removed drive line and pto pump from transmission. removed access panel and shift tower. disconnected electrical connectors. removed cooler lines and unbolted cooler from transmission, left in truck. removed transmission. installed new bell housing onto new transmission. transferred rear yoke and sensors from old transmission to new transmission. transferred release bearing forks from old to new. transferred speed sensor from old to new. transferred pto mounting bolts from old to new transmission.

6269-- installed flywheel clutch and new trans torqued all bolts

#861 12/29 install harness and found it would not reach sensors. remove trans cooler and relocate the harnesses. lay all hoses and lines in place. connect all sensors. secure the rear trans mount. the coolant line to cooler is too short. need to add line to reach the cooler. new cooler is straight in and the other was turned at a 90. ready to tighten all brackets. eos

#861 12/30 secure coolant hoses. lay the harnesses and hoses in place loose. used a ratchet strap to pull the clutch linkage back to unlock the self adjusting clutch. once it released, was able to bolt the clutch linkage together and adjust the free travel. the clutch brake is good right now. clean the PTO and shifter housing. install the shifter and found the top boot is cracked and needs to be replaced. remove the shifter control lines and connect to the new trans and new style valves. secure the air lines. Install the PTO and ck the
