COMPLAINT:

01 C & D RANGE WILL NOT STAY ENGAGED - OIL LEAK ON SIDE OF TRANSMISSION - CHECK BALER MONITOR, ITS IN THE TRACTOR (SEE RODNEY WITH QUESTIONS)

Details:

CORRECTION:

Recon Complete Trans.

Drove tractor around to see what the problem was and when you shifted to C or D range it would pop out. Brought tractor in shop and started taking stuff apart to split the tractor. put the splitting stands under the tractor and split it. pulled off the transmission housing and then the range box. when i tore apart the range box i found the c and d synchronizer was cracked the shift fork was missing the plastic boots so i wore out the shift for so i ordered the parts to fix it and put it all back together. i tore apart the transmission and put new disc in it. put all new gaskets between everything. and mounted it back to tractor. i replaced two steel lines that were kinked. i rolled the tractor back together and hooked all the lines back up. and drive lines. when i started the tractor i had a bad line going from the charge pump to the filter housing so i had to replace it. after replacing that i test drove tractor for 30 mins and everything is shifting as it should. topped off the hydraulic oil after putting loader back on and tightened up a lose coupler on loader hose that was leaking. everything is working properly.
