2	27876	2/0 3/8 COPPER LUG				
1	DOT INSP	Federal Annual Inspection				
7.5	Shop Supplies	Shop Supplies/ per labor hour				
7.5	Mechanic Hours	Mechanic Hours - Labor to check trailer out for DOT inspection. We scraped and power washed reflective tape off the side of the trailer. We painted areas where tape was and installed new reflective tape. We checked the operation of the brakes and the brakes on the trailer worked as they should. We replaced the breakaway battery in the breakaway unit to make sure the brakes would lock up upon cable separation. The breakaway system works as it should. Last we checked out the winch for not functioning properly. We found the battery to be weak and not taking a charge. We removed and replaced the battery. We also found a battery cable that was going to the contact lead to be dead shorted and dry rotted inside. We removed or replaced the cable and installed new ends on the cable. The winch now works like it should. We test drove the unit all was good. Thanks!
